

This line graph illustrates the historical trend of COVID-19 cases in the United States, categorized by age group. The x-axis represents the year from 1940 to 2020, and the y-axis represents the number of cases. The data shows a significant increase in cases starting around 2020, with a sharp peak in late 2020 followed by a decline. The age groups are represented by different colored lines: 0-4 (blue), 5-17 (orange), 18-24 (green), 25-34 (red), 35-44 (purple), 45-54 (brown), 55-64 (pink), 65-74 (gray), 75-84 (light blue), 85+ (dark blue), and Total (black). The 0-4 age group shows the highest number of cases, peaking at approximately 1.5 million in late 2020. The 5-17 age group follows, peaking at about 1.2 million. The 18-24 age group peaks at around 1.0 million. The 25-34 age group peaks at about 0.8 million. The 35-44 age group peaks at about 0.6 million. The 45-54 age group peaks at about 0.4 million. The 55-64 age group peaks at about 0.3 million. The 65-74 age group peaks at about 0.2 million. The 75-84 age group peaks at about 0.1 million. The 85+ age group peaks at about 0.05 million. The Total cases peak at about 1.5 million.
